NOT TO BE USED FOR NAVIGATION

SOPAC/EU Project:
Reducing Vulnerability of Pacific ACP States

Bathymetric contours shown at 20 metre intervals (SOPAC/EU data), and 50 metre intervals (NOAA data)

Land area

Offshore data by NOAA: Observed soundings have no vertical datum collected by R.V R.H. Brown, presumably in 1999

Boundary delimiting SOPAC/EU data (nearshore) and NOAA data (offshore)

Observed soundings have been reduced to Nauru Island Datum defined as 0.229 m below LAT, 1.3986 m below mean sea level (MSL 1993-1994), and 7.2930 m below the fixed height of Benchmark NAU 1
